

New Tabs Layout to Make it Easier and Quicker to Find Relevant Listings, Leads and Deals

As each of our clients grows the number of listings, leads and deals over time we have realised it is becoming increasingly important to have a quick and easy way for agents and admins to see the most relevant records to them when they first visit any screen.

Previously in PropSpace we displayed all records by default on each screen, auto-ordered by the last updated date. We realise that this now does not make the most sense for an agent who needs to focus on the most critical records for their daily work (i.e. their open leads and deals and available listings), especially as an agent's number of leads, contacts and properties is ever expanding.

So taking this feedback from many of our long-standing clients on board, we have made a change to the default records that each user sees when they visit a screen in PropSpace as follows:

Listings Screens - Sales and Rentals

My Listings Tab

 Share Options Save Search Q Advanced Search Send SMS M E S Ref Secondary Ref Unit Category Emirate Location Min 3 chars Min 3 chars 	My Listings		Jnavai	aore	Archived	21341183	ending Appr		Listing Q	adiney
